

Broadband Terminated Folded Dipole

The TFD series of simple, wideband folded dipoles is a versatile solution crafted to meet a diverse range of applications and scenarios.

Developed around the reliable TFDBB 200-watt antenna, the series offers various options including higher power, economy, and banded versions, to cater to your specific needs.

The TFD series is specifically designed for environments where space is limited and low frequencies are unnecessary, making it an ideal choice for optimising performance in constrained settings without sacrificing efficiency. Tailored for modern VSWR-sensitive transceivers, it delivers outstanding VSWR performance across its operational frequency range, ensuring seamless and reliable communication with minimal signal loss or interference. With efficiency rapidly increasing from 5 MHz and above, the TFD series provides consistent, smooth performance even at higher frequencies.
